## FEATURED PROGRAM TOPICS FOR 2018

### Native Bees in Our Backyards

European honey bees take a backseat to the almost 4,000 species of bees native to North America. Learn about the lives of these pollination machines through an exploration of common species and the habitat each require for nesting and survival.

### Beneficial Insects and Animals

Explore bees, beetles, butterflies, flies, wasps, and ants, along with certain bats and birds that assist in pollination. Some also provide seed carrying and distribution, which is essential to our environment. Finally, explore common garden pests and the native predators that are better than pesticides.

### Butterfly Basics

From caterpillar to cocoon, and from migration to motherhood, delve into the complex life and life-cycles of butterflies. Many species of our native butterflies have preferred host plants that they use to lay their young. Discover more about these beautiful pollinators and how you can support them.

### Plants for Pollinators

Creating a pollinator garden requires more than just planting flowers, although those are a great start! Learn how to create a pollinator garden that provides forage and habitat year round for a variety of pollinators, along with other beneficial insects and animals.

### Recreating Lost Habitat

Farms, schools, businesses, and individuals can take part in saving and restoring habitat that supports populations of struggling beneficial insects and animals. Gain an understanding of the many problems facing our native wildlife and what you can do to help.

*Spriggly's can provide the common core standards met in each curriculum if needed for school-aged children.*

### Don't see a nature-based program topic that suits your needs?

Spriggly's create the course that's perfect for you.

### Interactive Activities

- Paint/color your own native bee or butterfly cabin
- Create seed bombs
- Plant a pollinator garden at your site
- Make native bee nesting tubes with colorful craft paper

# NATURE-BASED PROGRAMS

## STANDARD PRICING

### Talk/Workshop Rates

*Handouts included*

30 minutes: \$75

45 minutes: \$100

1 hour: \$125

Each additional 15 minutes: \$25

### Interactive Activities

*The prices below are an additional per student cost*

**Paper Bee House: \$1**

**Seed Bombs: \$5**

*Paint-Your-Own*

Wooden Bee Room: \$5

Wooden Itty Bitty Bee Cabin: \$15 each

Wooden Butterfly/Bee Cabin: \$30 each

## POLLINATOR AND WILDLIFE EXHIBITS

### EDUCATIONAL • FUNCTIONAL • ENVIRONMENTAL

Become a part of the solution! Use your space as an opportunity to educate, build awareness for wildlife, and recreate habitat through a living exhibit.

Each Spriggly's exhibit is specifically designed for your space and includes informational signage. Exhibits can include housing for native bees, birds, butterflies, and bats, along with pollinator gardens and/or habitat restoration. Spriggly's also creates exhibits highlighting other types of wildlife, conservation, and general environmental awareness; each exhibit is handcrafted specifically for your site.

*Spriggly's bee cabins are made from reclaimed and recycled wood*
